Awesome man, thanks!! Looks great..

A couple small notes --

My richroll.com e-mail doesn't seem to be working right now. Not sure what's up, but should probably switch my e-mail to richroll@mac.com for right now.

On the blog, there seems to be a header / titles formatting problem...looks off

Press: for now I just uploaded some photo galleries but at some point would be better to be able to upload full PDF's of any articles. Want to be able to post downloadable PDF's of articles (or hyperlinks to articles on the web), as well as include both audio files (my everymantri interview) and video file interviews (my interview with gold medal mel)...Maybe you can help walk me through how to do this at some point

Photos on header / banner -- are we going to replace the colored boxes with some photos?

Thanks for everything -- it really looks awesome:)
